November 4, 2018

From the President's Pen:

First and foremost, please thank your officers and volunteers, who keep our club clean and well maintained. This has been an exciting year at our club, please read below all the exciting things that have happened.

We had logging done at our club that removed dead or old standing trees on our property. This work was performed by a local logger Scott Brown. We project we will have an income of \$20,000.00 when Scott is done.

The 50yard rifle range back stop was moved and reconstructed to make a true 50 yard target.

Our old well was producing non-potable water, and the pump failed as well. We needed to install a new well because the location of the old well did not meet current DEP regulations.

We need to install new poles and wire to supply electricity to the buildings located at the top of our property. The existing poles and wire had to be replaced due to age and safety.

Our hot air oil furnace in the meeting room is in need of replacement. The furnace is 23 years old, and is rusting at various places with pin holes in the heat exchanger. All of these projects were needed to keep the club up and running now and for our future.

Moving forward to 2019, please come out to our meetings every last Monday of the Month, and introduce yourself to your fellow members. We will be having more work detail Saturdays this upcoming year to clean up around the property, with a concentration on the attic. Again, come out it is a four-hour day with a great \$5 breakfast that starts at 7 am.

Your club needs your help to bring new ideas to generate fund raisers to keep the lights on, please consider being a part of it.

Thank You

Glenn Reichardt, President
